EU-GUGLE
Measuring the results of accompanying measures - some lessons learnt

Michael Heidenreich, BOKU

Aachen
22-04-16

Initial Survey on socio-economic aspects

Interviewed have been in:
- Aachen - 14 households
- Bratislava - 16 households
- Gothenburg - 14 citizens
- Sestao - 41 households
- Tampere - 28 households
- Vienna - 15 households

Some inquiries in the following...
Are you the owner of your home/flat?

Occupancy of the dwelling
Is there moisture in your dwelling?

Type of heating system in the home
Conclusions

- Insufficient knowledge of effective ways to reduce household energy use.
- Used energy carrier and building equipment and appliances are quite diverse.
- Private energy consumption is part of a complex network with the necessity to understand it.
- Rebound effect are estimated <50 % for the household sector / much less for the business sector.
